SECURITRON

DT-7 Seven Day Digital Timer

Used to turn electric locks or other security systems on and off at programmed times. A 10-Amp DPDT relay can be operated in toggle or pulse mode at selectable times during the week, with 12 programmed on/off times set daily, on selected days, or on blocks of days (Monday-Friday, Monday-Saturday or Saturday-Sunday).

- "First Man In" relay
- The prime timer operates on 12 or 24 volts AC or DC
- Memory backup

JV# 410-825
MFG# DT-7

TSB Touch Sense Bars

The touch sense bar has no moving parts therefore it does not suffer mechanical wear. No pressure is required for use which provides superior egress safety for frail and disabled people. The simple act of touching the bar, even through gloves or clothing, trips an electronic sensor which releases the door.

JV# 415-115

JV# 415-121

JV#	MFG#	Description
415-115	TSB-3CL	Touch Sense Bar-Aluminum
415-121	TSB-3BK	Touch Sense Bar-Black

Timemate TM-9

The TimeMate is an ultraminiature timer that functions to extend momentary switch closures (N/O) up to 36 seconds. The TimeMate either fits in the box or can be mounted on the exterior with the supplied double stick tape. When the switch is operated, the TimeMate's 3 Amp SPDT relay energizes for 2 to 36 seconds after which it resets. It operates on 12VDC, 24VDC or 24VAC power. Actual size: 3/4" x 1" x 2".

JV# 410-800
MFG# TM-9

VON DUPRIN

Electrical Power Transfer

The Electrical Power Transfer provides a means of transferring electrical power from a door frame to the edge of a swinging door. The units are completely concealed when the door is in the closed position.

Two 18 gauge wires, 2 amp
Finish - SP28 (sprayed aluminum)

JV# 476-325
MFG# EPT-2-SP28

Rake Picks

JV#	MFG#	Description
314-695	PKX-DM-P	Double Mountain Plain
314-697	PKX-TR-P	Traditional Plain

Manual Pick Gun

The PKX-GUN-M, Manual Pick Gun, is the best pick gun available. Used by locksmiths everywhere, the pick gun allows you to pick a wide variety of locks. Included with the Manual Pick Gun are three picks and a tension wrench.

JV# 314-700
MFG# PKXGUNM

Pick Sets

11 Piece Pick Set

Set includes 8 picks with stainless steel handles and 3 tension wrenches in a soft luggage quality leather snap case.

JV# 314-705
MFG# PKX-11

14 Piece Pick Set

The most popular pick set comes with nine picks, a broken key extractor, and four tension wrenches, all in a soft luggage quality leather snap case.

JV# 314-707
MFG# PKX-14

20 Piece Pick Set

The MD Set features a zippered leather case with 20 picks and tension wrenches.

JV# 314-733
MFG# PKX-20

32 Piece Pick Set

Large set includes a variety of tempered stainless steel hooks, rakes, balls, diamonds, key extractors, and tension wrenches.

JV# 314-712
MFG# PKX-32

17. Transponder Tools

AD30 Transponder Coil Detector

The AD30 Transponder Coil Detector has been designed to assist with the diagnosis of all Immobilizer systems using transponder technology. One of the critical components of an immobilizer system is the coil or antenna fitted around the ignition barrel. When diagnosing problems with the immobilizer system, there is always the question of "Is the immobilizer antenna transmitting a correct signal to power the key transponder?", by using the AD30 this question can be quickly and easily answered, saving valuable time and money.

The AD30 is placed near the ignition barrel in the steering column and provides a visual and audible indication of antenna power. Additionally on certain vehicles, by switching the ignition on, a further indication of a transponder signal being sent by the ignition key and received by the antenna can also be provided. If you already have Advanced Diagnostics Key Programming equipment the AD30 is an essential addition to your tool kit that will earn its keep within a few jobs.

AD90 Transponder Duplicating Machine

The professional duplicating machine, AD90, has been designed and built to keep pace with the constant evolution of transponder car keys.

The AD90 key duplicator features the most innovative electronic components in the field of radio frequencies thus allowing easy detection, reading and cloning (duplication) of fixed code transponders and the identification of cryptographic transponder codes.

The AD90 in addition has major features such as copying of Crypto 42 type transponders and the Texas 4C and 4D transponders. These are additional options but make the AD90 a powerful tool.

The AD90 has been developed to allow for future developments and to keep up to date with the ever expanding technology of transponders within the Automotive vehicle systems.

As well as Transponder systems, the AD90 will also be developed to offer new and exciting facilities which will further advance its capabilities.

Transponders covered are TEMIC, PHILIPS, MEGAMOS, NOVA & TEXAS.

MVP Transponder Key Programmer

The new MVP System (Multi-Vehicle-Programmer) transponder key-programming machine is identical to ASP's T-Code the MVP to be the first fully functional transponder key programmer sold at an extremely low initial buy-in price and used by the locksmith on a Pay-Per-Use basis.

*Low initial purchase includes all hardware, standard cables, adapters and instructions. *All future software updates developed by Advanced Diagnostics for the MVP will be downloadable for FREE to any MVP user, NO UPDATES TO BUY EVER!

*Once purchased, the Key Tokens are loaded to the unit via the Internet. *All types of vehicles require only one Key Token per key programming regardless of make or model—Acura to Volkswagen—they all cost the same.
